

## Gender fluidity

To depict the concept of gender fluidity, here are some deliberate stereotyped propositions (that you can adapt as you wish).

You can answer as masculine or feminine (according to your sex assigned at birth, or not ;)).

Answers make you win points. At the end, you take place on a numerated line like the following one, representing the “gender spectrum”.

Variations:

- You can also do the exercise again, but by answering to the questions for the other sex.
- If you're comfortable (like, "I have nothing to hide") with people around you, everybody can take place on the 0 at the beginning and move at every question asked by the "game" leader.
